Lightweight Repair System For Rebuilding Vertical & Overhead Surfaces

Belzona® 4141 (Magma-Build) is a two component lightweight repair composite for the rebuilding of damaged vertical and overhead concrete surfaces. This high build repair system simplifies application whilst providing long term protection.

Belzona® 4141 (Magma-Build) will:

- Simplify maintenance procedures
- Cut downtime
- Avoid costly structural rebuild
- Reduce safety hazards
- Provide long term protection

Belzona® 4141 (Magma-Build) can be applied up to 5 inches (12.7cm) thick on vertical surfaces and up to 3 inches (7.6 cm) thick on overhead surfaces with minimal support during application. Fixed shuttering or formwork are not required and it is ideal for both internal and external masonry.
